AutoCAD uses the Excell engine for VBA automation. VBA is a programming language written for Microsoft Excel. This allows users to interface with the commands of AutoCAD via Excel. The Revit Autodesk360 and Autodesk Fusion 360 products both allow users to access their projects through the web. This allows users to access their drawings and other files to annotate their drawings, collaborate on a project, view a project's plans and sections, and see real-time updates. These are similar to BIM 360 and Fusion 360 in that they allow users to visualize projects from all three dimensions (XYZ, U, V) and connect to and access models with some common features: Design Intent Specifications (Disegno Intento) Data Logging (Document Logging) Geometry Editing 3D Layers Object Association Change Management The product replaces the previous Autodesk360 software which was called Building Information Modeling (BIM) 360. In 2018, Autodesk released a new cloud-based web based design platform called Project 360, that works in conjunction with Autodesk's Building Information Modeling (BIM) 360 and Visual Building Information Modeling (VBIM) 360 products. Architecture AutoCAD is delivered in a graphical user interface. The user interface consists of icons, toolbars, and status areas. The user may select commands, create custom commands, and view help information for various features and objects. The commands are listed in a pulldown menu at the top of the screen. AutoCAD has an undo feature and various shortcuts for the user's convenience. In the drawing window, there are several key commands that can be bound to keystrokes. These commands can be assigned to the number pad or other keys. There is a pull-down menu for choosing which keystrokes can be bound to which commands. Command layout In the previous versions of AutoCAD, a "Command Layout" was accessed via the System menu. This could be used to update the Command Reference, or to assign and unassign a command to a hot key. In the newest versions, this has been moved to the Autodesk Toolbar menu under "Choose Commands".
